fruiSCE® ERP Key Features

- **Accounting:** fruiSCE® ERP records and processes accounting transactions within functional modules such as accounts payable, accounts receivable while automating the financial operations and ensuring regulatory compliance .
- **Order Management:** Order management is simply the process of efficiently tracking and fulfilling sales and purchase orders. It includes the cycle of people, processes, and suppliers to create a positive User experience. The order management process starts from when an order is placed, to keeping track of that order until it is fulfilled.
- **Sales Order Management:** It implements the functions of order placement, order scheduling, shipping, and invoicing
- **Procurement:** Maximize cost saving with support for the end-to-end procurement and logistics processes and ensures that each and every purchase is necessary, justified and optimized according to requirement.
- **Facility:** Facility refers to inventory management which enables businesses to control their logistics, operations, and inventory from a singular system reducing errors and improving efficiency
- **Manufacturing:** Manufacturing is a highly functional seamless application that contains everything you need to run an efficient and successful manufacturing business.
- **Material Requirement Planning:** It helps to find when running a manufacturing process regularly, helps a business to plan what to manufacture and when to manufacture it.
- **Party Manager:** The Party Manager is designed to administer information about Parties, including their identity, their roles, how to contact them, etc. Each party is given a specific Party ID which represents them as they interact within the system.

- **Financial accounting:** general ledger, fixed assets, payables including vouchering, matching and payment, receivables and collections, cash management, financial consolidation
- **Management accounting:** budgeting, costing, cost management, activity based costing
- **Human resources:** recruiting, training, rostering, payroll, benefits, retirement and pension plans, diversity management, retirement, separation
- **Manufacturing:** engineering, bill of materials, work orders, scheduling, capacity, workflow management, quality control, manufacturing process, MRP, manufacturing flow, product life cycle management
- **Order processing:** order to cash, order entry, credit checking, pricing, available to promise, inventory, shipping, sales analysis and reporting, sales commissioning
- **Supply chain management:** supply chain planning, supplier scheduling, product configurator, order to cash, purchasing, inventory, claim processing, warehousing (receiving, put-away, picking and packing)
