KEY FEATURES

Load Management:

Fleet Load management module provides a single window to Create, View and Drop and process all customer orders. The steps include receiving orders from different sources, confirm orders and plan delivery along with optimized route with optimum trip costs with track & trace capability.

Trip Management:

Trip Management will monitor the daily trip activity, and will helps to ascertain timely delivery of shipments and will helps to control and minimize the expenses during the trip. Will helps the transparency of all expenses and settlements of all trips.

Vehicle Management:

fruiSCE FMS contains vehicle management system which helps to maintain records of your trucks with purchase, lease, open market, and finance, EMI details and insurance, permits and other renewable data for statutory regulations is maintained with ease.

Driver & Co-Driver Management:

fruiSCE FMS have a feature to monitor and measure all drivers and co-drivers behavior. This module allow to analyze acceleration, harsh braking, speeding, and over idling, among others. Maintenance costs and downtimes will be reduced and performance improved.

Fuel Management:

fruiSCE contains fuel management to monitor fuel levels 24/7 and see how often vehicles are being refueled and drained. Average fuel consumption is calculated, per vehicle and time period.

Maintenance & Inspection

Maintenance and inspection module will help to streamlines preventive, tyre, container maintenance. Also scheduling to track and manage repairs and enables you to set service reminders. This system ensures your vehicles are safe and road-ready.

Claims Management

fruiSCE TMS contains claims management module to support all involved parties i.e., transporters, 3PL operators, freight forwarders, distributors, and manufacturers in transportation to ensure quick and accurate processing of claims by their clients.

Route Management

fruiSCE TMS contains Itinerary Management to determine shipment routes and shipping legs for specific requirements with priority sequencing, route visibility, variable rates features.

Vendor Management

fruiSCE TMS covers end-to-end process for brokerage and agents to support global and local transport operations seamlessly. This feature is very well integrated with rest of the modules and provides complete solutions.

INTEGRATIONS

Master Data

ERP

Orders (Sales, Purchases, Loads)

Supply Chain Systems

Proof-of-Delivery & Payments

GPS

KEY PERFORMANCE INDICATORS

On-time pickups

Truck turnaround time

Claims as % of freight costs

Load vs capacity utilization

Trip cost per unit shipped

Trip bill accuracy
