TRANSPORTATION MANAGEMENT.....

Logistics companies are struggling to cope up with challenges to maintain competitiveness and increase efficiencies in operational processes. The struggle increases through operation of transportation process with manual or legacy solutions. The complex design and implementation of traditional transportation management systems are creating redundant processes and reducing flexibility. Organizations need a system that can handle all kind of scenarios with ease of use and mobile productivity.

fruiSCE® Transportation Management is a comprehensive life cycle solution for all involved parties in transportation and logistics, help customer to move products between two or more locations.

Supply Chain Flow

- Key Benefits**
- Optimized shipment planning and execution
 - Rate optimization for all scenarios
 - Manage fleet, shipments, invoicing and expenses
 - Support project transport, fleet owners, 3PL & freight forwarders
 - Tracking and tracing to avoid surprises and improve security
 - Transportation intelligence for performance management

World Class Transport Operations

fruiSCE TMS ▶ Business Process Flow

KEY FEATURES

Transport Order Management

Transport order management module provides a single window to view, manage and process all customer orders. The steps include receiving orders from different sources, confirm orders and plan delivery along with optimized route with optimum freight costs with track & trace capability.

Transport Order Planning

fruiSCE TMS provides transport order planning to optimize resource utilization and performance. The order planning process helps to optimize costs, increase service level for deliveries, and container utilization.

Shipment Execution

Shipment execution is the core transportation process seamlessly executed through fruiSCE TMS. fruiSCE TMS optimizes shipment execution process with multiple partners to achieve efficiency and effectiveness in transport operations.

Shipment Settlement

All financial transactions towards settlement of invoices are done through invoicing module which is integrated to ERP. fruiSCE has an effective cost settlement functionality which helps to select best rate automatically as shippers plan and tender to carriers.

Container Management

fruiSCE TMS covers container management feature which enables manufacturers, distributors, and 3PL providers to achieve complete visibility, tracking, movement of inbound containers and inventory, and measuring productivity.

Claims Management

fruiSCE TMS contains claims management module to support all involved parties i.e., transporters, 3PL operators, freight forwarders, distributors, and manufacturers in transportation to ensure quick and accurate processing of claims by their clients.

Itinerary Management

fruiSCE TMS contains Itinerary Management to determine shipment routes and shipping legs for specific requirements with priority sequencing, route visibility, variable rates features.

Brokerage and Agents

fruiSCE TMS covers end-to-end process for brokerage and agents to support global and local transport operations seamlessly. This feature is very well integrated with rest of the modules and provides complete solutions.

INTEGRATIONS

Master Data Integration

Shipment Order

Sales/ Purchase Orders

PoD

Payments

Performance

KEY PERFORMANCE INDICATORS

On-time pickups

Truck turnaround time

Claims as % of freight costs

Load vs capacity utilization

Freight cost per unit shipped

Freight bill accuracy
